Great KickOff Meeting:

We had a great kickoff meeting on September 19 at the Holiday Inn, Greenville. John Spray, our guest speaker, shared his life long engineering experiences both as an engineer and an operational director at Fluor.

John's advice on successful transitioning from a technical career to a managerial role was invaluable to the audience. He also shared the type of personal skills that he viewed as critical to succeed in management. To the junior engineers and the newly graduates who started launching their technical careers, John offered some useful tips in the area of job interview and resume preparation.

For those that are interested in receiving a copy of John Spray's presentation, please e-mail to teresa.cheung@fluor.com for an electronic copy.

October Meeting Notice:

This year our local AICHE chapter has attempted to invite speakers to cover a wide variety of interesting topics. If you are interested in learning about using a systematic approach to problem solving, this next presentation is for you! Our next meeting topic "Building Models from Simulation Runs" focuses on using a design of experiments (DOE) approach to build models from simulation runs with minimum time and effort. This meeting will be held at Clemson University.

Our presenter, Magali De Macedo has 15 years of process engineering experience in design, quality, and manufacturing. She is a licensed professional engineer, and she is also an expert in the application of statistical and quality management tools. Presently, she is a process engineer for the Chemical Technology Center unit of Fluor Corp.
